Reasons For Allowance

Claims 1 – 44 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a nonlinearity detection system and method for an analog to digital converter (ADC) that comprises a differentiator module that communicates with the ADC and that generates an output signal that is based on an output of the ADC and a delayed output of the ADC.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

3. Smith (US Patent Number 3,506,818) discloses a digital integrator with automatic base line correction.

4. Bruwer, Jr. (US Patent Number 3,544,736) discloses a broadband transmission testing apparatus.

5. Peek et al. (US Patent Number 4,318,086) discloses a (B+A)-bit ADC with B-bit auxiliary ADC.
